Interactive comment on “The GRENE-TEA Model Intercomparison Project (GTMIP): overview and experiment protocol for Stage 1” by S. Miyazaki et al.

Anonymous Referee #2

Received and published: 14 June 2015

General comment:

This paper suffers from a confusing presentation. What do the authors want to present? A protocol or results?

In the abstract it says this paper presents an experiment protocol, but also preliminary results are mentioned. The main body of the paper focuses on the experiments (setup, datasets, plan, output) and on the preliminary results, which gives the reader the impression that the main focus is not the protocol, but the experimentation results. This impression is additionally by the authors phrasing. For example, page 6, line 20: this paper focusses on stage 1 of the project, which evaluates the TPMs.... etc.". Another
example are the scientific questions at page 7, lines 10-14. Lines 13-14 are specifically important, because that is what is exactly lacking in the paper (which processes are responsible for model performance), if the focus is on results rather than on protocol.

A last example is the language used: page 10, line 25 "we will examine", page 11, line 8 "we will conduct". This is the kind of phrasing which is being used in a result-oriented paper.

However, as a result-oriented paper this manuscript is insufficient because all results are preliminary, and the results are not discussed.

Based on this I would reject the paper.

The summary (4) is however quite clear, this paper wants to present a protocol, and the preliminary results are an example.

My advice is to rewrite the paper, and make the audience more clear what your intentions are, right from the start of the manuscript.

Technical comments: page (p.) 3, line (l.) 4: replace one of the "system" by another word p3., l9.: planned and conducted at the same ? p3, l19: replace "due to" by "using" p3, l20: delete "the" p4, l10: delete "some" p4, l20: replace "This" by "The same" p4, l27: add a reference p6, l13: replace "This" by "a" p9, l6: "aims"
