Received and published: 1 December 2015

As suggested, we changed the title, now, it is: Evaluation of an operational ocean model (NEMO2.3) configuration at 1/12° spatial resolution for the Indonesian seas (INDO12). Part I: ocean physics

We added a new section ’Code and Data Availability’ at the end of the manuscript.

The INDO12 configuration is based on the NEMO2.3 version developed at Mercator Ocean. All specificities included in the NEMO code version 2.3 are now freely available in the recent version NEMO 3.6, see the NEMO web site
