"Dear authors, In my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.1: http://www.geosci-model-dev.net/8/3487/2015/gmd-8-3487-2015.html This highlights some requirements of papers published in GMD, which is also available on the GMD website in the ‘Manuscript Types’ section: http://www.geoscientific-model-development.net/submission/manuscript_types.html

In particular, please note that for your paper, the following requirement has not been met in the Discussions paper: ‘The main paper must give the model name and version number (or other unique identifier) in the title.’ For a model evaluation it is important to know, which model version exactly was evaluated. Therefore, please add a version number for the TOMCAT model in the title upon your revised submission to GMD. Yours, Astrid Kerkweg"

Many thanks Astrid Kerkweg for bringing this to our attention. We have modified the title to include the version number v.1.6:

The TOMCAT global chemical transport model v.1.6: Description of chemical mechanism and model evaluation
