Interactive comment on "eWaterCycle: a hyper-resolution global hydrological model for river discharge forecasts made from open source pre-existing components" *by* Rolf Hut et al.

Rolf Hut et al.

r.w.hut@tudelft.nl

dear executive editor,

thank you for pointing out our error in not including the version number in the title. In the final revised document, upon publishing in GMD, we will add the version number of the GitHub repo that holds all our code.

thanks for your comment,

dr. ir. Rolf Hut
