Reply: The data set will be made available through the U.S. Forest Service Research Data Archive: http://www.fs.usda.gov/rds/archive/

The US Forest Service Research Data Archive contains the data set, complete metadata for the data set(s), and any other documentation the researcher deemed important to understanding the data set(s). Each data is assigned a digital object identifier (DOI) identifying the content and providing a persistent link to its location on the Internet. The process of submitting / publishing a data set on the US Forest Service Research Data Archive typically requires two to three months. We have initiated the process.

Questions: 1. Do we need to submit a data set temporarily available during the review process?

2. Must our data set be available in the US Forest Research Data Archive prior to publication in GMD?

I look forward to your advice.

Thanks, Wei Min Hao
