Interactive comment on "Comparative analysis of atmospheric radiative transfer models using the Atmospheric Look-up table Generator (ALG) toolbox (version 2.0)" *by* Jorge Vicent et al.

Jerome LOUIS

jerome.louis@telespazio.com

Hello Jorge,

Could you please indicate which type of parametrization approach was used in the simulation performed with libRadtran. Was it LOWTRAN, REPTRAN (fine, medium, coarse)? And at which spectral resolution?

Best regards, Jérôme LOUIS
